FOR IMMEDIATE RELEASE

**WHEELHOUSE LAUNCHES FIRST EVER MULTI-FAMILY
MLS SEARCH**

**Technology Driven Brokerage Launches Website with
All Bay Area Multi-Family MLS Listings For Sale**

San Francisco, CA 3/26/2009 - Wheelhouse Investment Real Estate Brokerage, <http://www.wheelhousebrokerage.com>, an innovative brokerage company, today announced the Bay Area's first fully searchable MLS web site exclusively for multi-family apartment buildings. Investors can now search multi-family properties for sale in the entire bay area. Each property is listed with a full description, photos, price, cap rate, GRM and price per square foot. This feature compliments the existing 'Wheel Deal', Wheelhouse's name for their broker-reviews of other company's listed properties. The site now provides investors with a complete objective synopsis of all Bay Area multi-family properties.

“Transparency of information has become a number one priority to investors, especially in light of today's disreputable investment climate.” said Michael Thomas, co-founder and head of investor relations. “Brokers are starting to move away from being the gatekeepers of information, and we're excited to be leaders in this movement.”

Justin Shreve, co-founder and head of technology development, adds, “The bay area is one of the largest multi-family investment markets in the country and it is truly amazing that there hasn't been a centralized place to freely view what's listed on the MLS market. In today's tough economic times, multi-family real estate should really start to shine as a solid and stable investment option. We're hoping our site helps open the door to this possibility.”

How it works:

Wheelhousebrokerage.com, <http://www.wheelhousebrokerage.com>, is a map-based real estate search engine. It is free to use. Wheelhouse aggregates multi-family MLS listings from each individual Bay Area MLS and then provides a simple and easy way to browse or search investment opportunities.
